Echocardiography

Jean Kinney, Lecturer in Community and Family Medicine at Dartmouth Medical School, was the Associate Director of the Alcohol Counselor Training Program at Dartmouth conducted between 1972 and 1978. That program was the impetus for this text. Upon completion of the Alcohol Counselor Training Program, she became involved with Project Cork, a program established to develop and implement a model curriculum for medical student education and to create materials for health care professionals. She continues to be involved in professional development initiatives in the substance abuse field. In 1999, she was the first recipient of the Harold Hughes Award given annually by the National Institute of Medicine's National Institute on Alcohol Abuse and Alcoholism. It is given in recognition for efforts to assist in the translation of scientific research into clinical practice. *Loosening the Grip* was one of her efforts cited in this award. Accessible and comprehensive, *Loosening the Grip* remains an authoritative source for information about alcohol use and the problems associated with it, while also addressing the relationship between alcohol use and other drug use. This text presents the physical and psychological effects of alcohol alongside the impact of alcohol use on family and society. Special attention is given to addressing the range of responses to alcohol problems, prevention, harm reduction, brief treatment, engagement in treatment and aftercare, and addressing high risk drinking. Along with providing a historical foundation for the discussion of substance use, the book explains the facts about this complex issue in clear, engaging language. *Loosening the Grip* is widely recognized as a useful resource for future and current health care workers - substance abuse clinicians, school counselors, mental health workers, community nurses, and others.

The Deep Structure of Biology

Administering Medications: Pharmacology for Healthcare Professionals is designed to teach the safe administration of medications to healthcare students entering nursing, medical assisting, and other allied healthcare professions. This textbook speaks directly to students and encourages students to identify and apply the concepts learned. The organization of the chapters allows students and instructors to build a knowledge base that starts with the fundamentals of medication administration and progresses through the drugs frequently used to treat most common diseases. Most chapters are organized around a body system to help students fully understand drug actions. For easy identification, the 50 most frequently prescribed drugs are boldfaced in the Representative Drug table at the end of most chapters. The Patient Education, Healthcare for Today and Tomorrow, and Legal and Ethical Issues boxes continue to be highlighted features in this edition. The Patient Education boxes contain important information for the healthcare professional to communicate to the patient. This feature also includes cultural diversity and pediatric and geriatric implications where appropriate. The Healthcare for Today and Tomorrow boxes alert the healthcare professional to issues or problems that may be encountered today or in the future. The Legal and Ethical Issues boxes illustrate the role of the healthcare professional in actual legal and ethical situations pertinent to the content of each chapter.

Fit and Well
